1.

Question 1

Some of Carmen Reinhart's historical findings on sovereign defaults include: (check all that apply)

1 / 1 point

Governments have rarely repudiated their sovereign debt contracts

Correct

It is common for governments to solve their debt problems by inflating their currencies.

Correct

Sovereign defaults historically tend to occur in waves.

Correct

Governments who cannot repay their creditors often tend to repudiate their sovereign debt contracts.

2.

Question 2

Which of the following are justifications given for the existence of a corporate profits tax? (check all that apply)

1 / 1 point

Corporations participate, through the existence of a corporate profits tax, to the investment and maintenance of public infrastructures.

Governments may be forced to bail companies out or assist companies during bankruptcy proceedings, as exemplified by General Motors in the aftermath of the financial crisis from 2007-2008.

Correct

A specific share of nationalized companies in the profit-sector is a necessary ingredient for an efficient antitrust law.

Governments may have to step in for environmental damages beyond the limited liability of the company that has caused the damages, as exemplified by TEPCO in Japan following the earthquake from 2011.

Correct

3.

Question 3

How do local governments typically make use of the money generated by municipal bond issues?
